The Ingwe Journey programme

This letter is to confirm that the Ingwe Journey programme has the full support of the Ministry for Education.

The programme's objectives are in line with the principles and priorities of this administration and provides an opportunity for learner development in a fun, outdoor environment.

This programme comprises sections of the natural science curriculum and incorporates other learning areas such as language development, life skills, physical development, social sciences, arts and culture.

We are encouraged by Ingwe's commitment to environmental conservation, and we fully support their endeavours in training local community members to become eco-guides. We also commend their efforts to educate the community in environmental awareness and sustainability.

Ingwe has close links with various reputable organisations such as SANparks, Nature's Valley Trust, and The Landmark Foundation.

We believe that the programme is held in a safe and secure setting and that their facilities meet the necessary learner requirements.

Kind Regards

Donald Grant

MEC for Education
Western Cape
